## FROM WHITE HOUSE: SLEUTHS IN PANIC

PRESIDENT "ESCAPES"

President Wilson did not have the satisfaction of breaking a precedent yesterday when he slipped out through the basement door of the Executive offices to make a call on Secretary of State Lansing at the State Department across the street.

Not only did President McKinley make a similar call on Secretary Hay during the Spanish-American war, but Mr. Wilson himself has called upon members of his Cabinet before this to discuss official business with them More than a year ago-it chanced to be only a short time after he had delivered one of his addresses to Congress-Mr. Wilson went to call on Secretary of the Interior Lane and Postmaster General Burleson in their respective offices on the same day.

The Fresident's action in going from the White House to the State Department, with a sheaf of important papers in his hand and practically unattended, attracted a great deal of attention among those who are familiar with the usual formalities of Executive labors. The Secret Service men were thrown into a little panic by the news that the President had "escaped" again.

Having concluded his study of certain State Department documents, he decided to take them across the street to Mr. Lansing instead of following the usual procedure of sending them over by a White House messenger. He passed through the offices of Secretary Tumulty and that of the assistant secretaries, through the telegraph room and down the little stairway into the basement, which has an exit on the sidewalk to the west of the

# Austrian Envoy Will Leave Washington Permanently, Believe High Officials

New York, Sept. 8.—The New York Evening Post today prints the following dispatch from its Washington corre-spondent:

The opinion is entertained in high offi-

cial quarters here today that it is only a question of time when Dr. Constantin T. Dumba, the Austrian Ambassador. will leave Washington permanently. The explanation made by him to Secretary Lansing yesterday of his letter to his nt relative to a plan to embar gaged in the manufacture of war supplies by a propaganda and exercise of authority over Austrian subjects in this country has, in the opinion of persons high office here, increased rather than high office here, increased rather than diminished the seriousness of the issue thus raised. In effect, Dr. Dumba has not only defended the plan of action suggested in his letter to the Austrian government, but has left he impression that he was acting under instructions in formulating it. formulating it.
It was pointed out here today in re-

sponsible quarters that there are three ways in which Dr. Dumba can leave Washington officially. One is on his own initiative, by suggesting to his own gov-ernment that he desires indefinite leave of absence or a transfer. Secondly, this government may politely suggest to the Austrian government that Dr. Dumba's usefulness as its representative in this country is impaired. Finally, this government could at any time it desired hand his passports. It is believed here that the solution of the present situation will be the departure of Dr. Dumba, either of his own volition or at the suggestion of his own government.

The seriousness of the issue raised by the Austrian Ambassador, who is re-garded as the most astute politician in the whole Diplomatic Corps, lies in the suggestion to his government that he be empowered to exercise authority over Austrian nationals in the United States, amounting, in substance, to an appli-cation of the doctrine of extra territoriality. This doctrine the United States has never permitted to be employed within its borders, and, in fact, no nation its borders, and, in fact, no nation capable of making a resistance to its application has ever permitted it. Second-ly, the attempt on the part of a repre-sentative of a foreign power to overthrow, through direct control of his nationals, the policy of neutrality adopted by this country, which permits its citi-zens to sell and to manufacture any ommodity, subject only to the limita-known to entertain old-fashioned notions ons imposed by international law, is about the amenities of diplomatic inregarded here as a step in the direction tercourse, and know as well as anybody of infringement of that neutrality. While when the diplomatic code has been viobr. Dumba has merely suggested such lated. I step, that act alone comes within the ernment

It is stated here on reliable authority that Dr. Dumba himself does not ex-pect to be aware for a week yet as to the real attitude of this government to-ficult.

KING SEES NO DISARMING.

Spanish Ruler Expects More Arming
Than Ever After War.

Paris, Sept. 8.—Disarmament will not come after the world war, in the opinion of King Alphonzo, of Spain.

The nations will arm more than ever when the European conflict has come to an end, the Spanish ruler is quoted as saying to Senor Cevillier, an Argentine writer, in an interview published in the Espana Review.

With deadly poisons, which in time must ruin the health. Physicians say that to quickly dispel a dangerous accumulation of wind in the stomach and to stop the food fermentation which creates the gas, the acid in the stomach must be neutralized, and that for this purpose there is nothing quite so good as a teaspoonful of pure hisurated magnesia taken in a little water immediately after meals. This instantly neutralizes the acid, thus stopping fermentation and the formation of gas, and enables the inflamed, distended stomarial conditions. Bisurated magnesia is obtained in powder or tablet form from any drugsist; but as there are many different forms of magnesia it is important that the bisurated, which the physicians prescribe, should be distinctly asked for.

# The war and tea

To quench the thirst of millions in the trenches, every Army has chosen Tea-they are drinking millions of gallons of this refreshing and sustaining beverage from India and Ceylon It's a lesson in economy as well. You get four cups for a cent
